

HI, I'M

Nazariy Petryk

Full-Stack Software Engineer / Architect

TypeScript-first systems · Web, backend and cross-platform · Ternopil, Ukraine

5 years 1 month

of professional software engineering

CALCULATED FROM AUG 2021

Professional Profile

I build production web and cross-platform systems from architecture through deployment and operations. My core is TypeScript: Next.js and React applications, Bun and Node.js backends, PostgreSQL data layers, and Turborepo monorepos. I also design AI-enabled workflows with MCP, local LLMs and n8n, using Codex, Claude Code, OpenCode, Gemini CLI and Crush in hands-on development. Beyond the web stack I administer Linux infrastructure — Proxmox VE virtualization, virtual machines, SSH and application deployment. Currently expanding into embedded development with ESP32, targeting robotics, UAVs and automated production lines. I focus on maintainable domain models, security and measurable product outcomes.

Technical Stack

Frontend & UI

TypeScript · JavaScript · React · Next.js · Tailwind CSS · Radix UI / shadcn · Zustand · Redux Toolkit · Material UI · SCSS

Backend & Data

Bun · Node.js · NestJS · Hono · ElysiaJS · PostgreSQL · Drizzle ORM · Prisma · Valkey / Redis

RabbitMQ REST API WebSocket Zod

Cross-platform & Delivery

Tauri Rust Expo / React Native Turborepo Playwright Vitest

DevOps & Infrastructure

Linux Administration Proxmox VE Virtual Machines (KVM/QEMU) SSH Docker Nginx
App Deployment & Operations Prometheus Grafana OpenTelemetry PostHog

Embedded & Robotics — Learning

ESP32 C/C++ (Embedded) MQTT Sensors & Actuators Robotics UAV / Drones
Automated Production Lines

AI Agents & Automation

MCP n8n Azure OpenAI Local LLMs Ollama / LM Studio Codex Claude Code OpenCode
Gemini CLI Crush

Product Integrations

Auth.js ReBAC Resend Grammy Web3 / WAX Blockchain

Architecture & Leadership

System Architecture Domain-Driven Design Cross-Platform Development AI Integrations
Security & Authorization DevOps & Delivery Team Leadership

Selected Production Work

Public products I helped take from architecture to a live deployment.

COMPANY PLATFORM · LIVE ↗

Moonrock Software

Moonrock's public product ecosystem and client platform, presenting its Forge infrastructure, Neo AI layer, commerce products, roadmap and engineering capabilities.

`Next.js` `TypeScript` `Bun` `Turborepo`

Open live project ↗

E-COMMERCE PLATFORM ↗

OnlyDeck

A production storefront and operations platform for Ukraine's Steam Deck community, covering catalog, checkout, payments, delivery and after-sales workflows.

Next.js Bun PostgreSQL Turborepo

Open live project ↗

DEPLOYED · CURRENTLY TESTING ↗

Grant Navigator

A bilingual lead-generation and grant consulting platform with structured service journeys, case studies and conversion-focused contact flows. Deployed and currently under production testing.

Next.js TypeScript PostgreSQL Docker

Open live project ↗

Experience

Software Engineer / Architect July 2024 - Present

Moonrock

Architecting TypeScript-first web and cross-platform products. Built Bun and Node.js backends, Next.js applications, PostgreSQL data layers, shared monorepo packages, AI workflows with MCP and n8n, and production delivery infrastructure. Deployed Grant Navigator at yankovskayana.com and currently testing it in production.

Software Developer (NestJS) Sep 2025 - Dec 2025

Pilzi

Backend microservices development on NestJS + Prisma + PostgreSQL. AI automation implementations with Azure OpenAI + Custom MCP. Workflow orchestration for enterprise clients.

Middle Full Stack Developer Aug 2022 - Apr 2023

Extrawest

Full-stack applications for EV charging station management. IoT device integration via WebSocket and REST API. Real-time monitoring and energy analytics.

Middle ReactJS Developer / Team Lead Sep 2021 - Jul 2022

Softvision

Commercial React application development for product aggregation. Team Lead for 4 developers during NFT game development. Web3 integrations with Wax Blockchain.

Front-End Intern Aug 2021 - Sep 2021

SoftServe

UI component development in React. Learning enterprise development processes.

Education & Certifications

Certifications Ongoing

React + Next.js, TypeScript, Node.js Architecture

Currently Learning Ongoing

Embedded Systems: ESP32 → robotics, UAV and industrial automation

Languages

Ukrainian (Native), English (B2 - Technical)
